U. S. DEDICATES HER SHIPS TO FREEDOM, DECLARES HURLEY

PHILADELPHIA, July 26.—America demands commercial as well as political freedom for small nations, and to this end she will continue her struggle for world-wide democracy, even after German militarism has been crushed and the after-the-war trade competition begins.

This was the message of Edward H. Hurley, chairman of the United States shipping board, to diplomatic representatives of the Latin-American republics at the vast Hog Island ship-building yards, near here, today.

Dedicated to Freedom. Mr. Hurley declared that the great emergency fleet that is now being turned out at the numerous ship yards of the country is being dedicated to freedom; that after it has served its immediate purpose of defeating the common enemy of civilization, it will be equally effective as an instrument of an enduring peace.

"President Wilson has demonstrated to the world that the people of the United States are not fighting for the permanency of their own liberties alone, but for the liberty of civilization everywhere," said the speaker.

"The unselfish purpose of this country in the present war is recognized, I think, by the people of the nations you represent. The United States, mobilizing all its strength against the German government, is fighting for its own protection, and for your protection. Even Germany recognizes the fact that the United States has no desire to extend its own dominion."

The diplomatic party came to Philadelphia from Washington this morning on a special train at the invitation of the Shipping Board and the Emergency Fleet Corporation. The party lunched at the dining room of the American International corporation. The arrival of the diplomats at the shipyards was greeted by cheers of the thousands of workers. National airs of the various republics were played by the Hog Island Band.

BANCROFT HALL AT NAVAL SCHOOL TO BE READY OCT. 1

ANNAPOLIS, Md., July 26.—The Secretary of the Navy has authorized work on the new south wing of Bancroft Hall in order that a portion of it, at least, will be completed by October 1, six months in advance of the time agreed upon between the representatives of the Government and Miller & Co., the contractors. The east wing will be completed at the same time.

The completion of the east wing and partial completion of the south wing means that there will be accommodations at the Naval Academy for at least 300 more students than estimated, or actually room for 866 additional in Bancroft Hall. This means that there will be a larger class of reserve officers when the new scholastic year opens at the Academy.

Some time ago it was estimated that on account of lack of space and the greatly increased number of midshipmen, not more than 300 or 350 reserve officers would be taken for the intensive course. Now it is quite possible that the class the fifth will reach 600 or more.

The body of midshipmen will reach about 2,100, by much the largest class which has ever been in the Academy.

STOCKHOLM, July 26.—The soviet pan-executive council has placed its approval on the execution of former Czar Nicholas, it was learned here today.

Chairman Sverdloff announced at a meeting of the council that official notification of the execution had been received from the Ural Soviet, adding:

"The Moscow government had planned to give Nicholas a trial for his crimes against the people, but efforts of monarchists to kidnap the former Czar made his execution inevitable."

The pan-executives then passed the following resolution:

"We recognize that the execution of Nicholas was absolutely correct. Everdloff told the council that the body had come into possession of valuable documents taken from the former ruler, including his own diary and that of the former Czarina, and also correspondence between the former Czar and the monk, Rasputin, and between the Czarina and the monk. This will all be published shortly, it was said."

The press of Russia, including the socialist newspapers, is condemning the execution, declaring it cruel and unnecessary. Nicholas, they point out, was harmless, and they declare that the Bolshevik claim that the Czecho-Slovaks were planning to kidnap him was made for the purpose of discrediting the Czechs and also to excite the execution.

Reports have reached here that the Grand Duke Igor Konstantinovich, Kanstantin Konstantinovich, and Sergei Michaelovitch have been kidnapped from Alapayevsk after a severe battle with Red Guards.

CENTRAL CROWDED; BOARD RESTRICTS STUDENT BODY

Restrictions for entrance to Central High School because of overcrowding there, together with many changes affecting the organization and administration of local high schools, were made by the Board of Education yesterday at its regular meeting.

Limited restrictions proposed to relieve the strain at Central High School are as follows:

"All students promoted from the eighth grade to the high school to take academic work who live nearer the Western High School than the Central High School shall be assigned to the former school."

"Students entering the high school through the high school admission board shall not be assigned to Central High School except where material hardship would result from such assignment."

"Transfers from Central High School to Western High School may be made of students entering the Central High School who can conveniently reach the Western High School."

Another important measure adopted by the Board of Education was the appointment of a special committee to redraft the fraternity rule in such form as to make it intent clear without reasonable doubt.
